

FEDERATION OF AMERICAN HOSPITALS

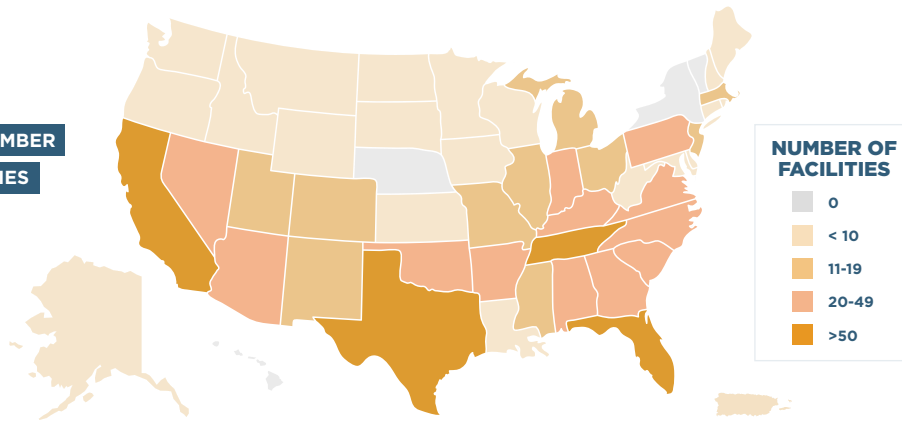

Ensuring Patient Access to 24/7 Care

The Federation of American Hospitals (FAH) represents leading tax-paying hospitals and health care systems to advance public policy that ensures patients and communities have access to quality, affordable care. Through our federal advocacy and policy analysis, FAH is committed to promoting market-based innovation, investing in the health care workforce of the future, and protecting access to full-service hospitals.

Our members include teaching, acute, inpatient rehabilitation, behavioral health, and long-term care hospitals and provide a wide range of inpatient, ambulatory, post-acute, emergency, children's, and cancer services around the country.

OUR MEMBER FACILITIES

INNOVATION

FAH member hospitals are leaders in innovation, implementing cutting-edge technologies to connect patients with quality care and services when they need it most. Whether helping patients access scheduling and health records in the palm of their hands, or providing telehealth access across rural communities, our hospitals connect patients to clinicians throughout the continuum of care, ensuring comprehensive and coordinated care that benefits the patient and community.

INTEGRATED CARE

By providing access to an integrated network of care, health systems increase coordination across patient care teams and services, leverage investments in technology, ease administrative burdens so doctors and nurses can focus on their patients, and reduce costs. Integrating sites of care keeps doors open for hospitals that are struggling financially and might otherwise close and allows hospitals to share needed resources after a disaster or weather-related event.

WORKFORCE DEVELOPMENT

Our hospitals are often the largest employer in the community, offering diverse employment opportunities and boosting local economies. FAH hospitals are training the next generation of caregivers through medical education and nursing programs, ensuring that communities thrive with well-trained healthcare professionals.
